DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Pearce et al. (US 5204033).

Pearce et al. discloses a method for preparing a perform for use in resin transfer molding process in which fibers are applied to a mandrel beyond the finished line (abstract, column 8, lines 27-29); a tackifier solution is applied comprising a reduced resin concentration (column 6, lines 1-11); the tackifier solution is locally consolidated using heat shrink tape (column 6, lines 12-24); and the fibers are cut along the final finish line (column 6, lines 55-68) as required by **claim 1**.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pearce et al. as applied to claim 1 above, in view of Black (US 5716686).

Application/Control Number: 10/758,404

Art Unit: 1762

The teachings of Pearce et al. as applied to claim 1 are as stated above.

Pearce et al. does not teach using a tackifier solution, which comprises resin to be used for the resin transfer molding process diluted by a solvent as required by **claim**2.

Black discloses a process for tackifying fabric material that is used in a molding process (abstract). Black teaches that it is best to use the injection resin thinned in an organic solvent as the tackifying adhesive because using a resin that is chemically different from the resin injected into the molding will degrade the strength of the cured resin and the resulting composite body (column 1,lines 44-59). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the process taught by Pearce et al. to use the same resin for the tackifier and injection process. One would have been motivated to do so because Black teaches that using different resins will degrade the strength of the cured resin and the resulting composite body therefore one would have a reasonable expectation of success in forming the composite.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cachet I. Sellman whose telephone number is 571-272-0691. The examiner can normally be reached on Monday through Friday, 7:00 - 4:30pm.

Application/Control Number: 10/758,404

Art Unit: 1762

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
